### Document Body

Hi, James,

Thanks for your question about TI and Tustin. As we discussed today, here's what I have in my notes. I hope this is helpful.

- Treasure Island - by 7/21 James Ricks will provide the site management plan showing the actions and schedule, and will send me an email letting me know that DOD is proceeding with the cleanup, whether the planned cleanup will address all of the problems, and what will happen when the cleanup is complete, final cleanup report, w/ or w/out 5-year review, etc.
- Tustin MCAS - by 7/21 James will try to find the appropriate documents and info and provide them to me.

Hi, James,

Our Superfund site assessment GPRA measure is Final Assessment Decisions. Final Assessment Decisions include sites where the site has been cleaned up or is making progress toward cleanup as supported by documentation (worksharing agreements, site-specific progress reports, AOCs, remedial action plans, VCP/Other MOAs, etc.) between the non-EPA party and EPA stating that the site has been or is being cleaned up or addressed according to appropriate cleanup standards. For Marine Corps Air Station Tustin and Treasure Island Naval Station non-NPL sites, I'd appreciate your assistance in letting us know whether these site meet the above definition and in obtaining (brief) documentation that the sites have been cleaned up or are making progress toward cleanup, including the schedule for completing the cleanups. Please give me a call at 2-3098 when you have a moment to discuss this. Thanks for your help.
